

Stadium Solutions

BUILDING BETTER FAN & GUEST EXPERIENCE

Sports and recreation facilities attracts large crowds that require entry and exit in short periods which creates many security and operational problems. Most of these facilities have become multifunctional complexes that conveniently and securely integrate commercial, retail and dining venues. Easy, secure and fast access is essential for the best guest experience.

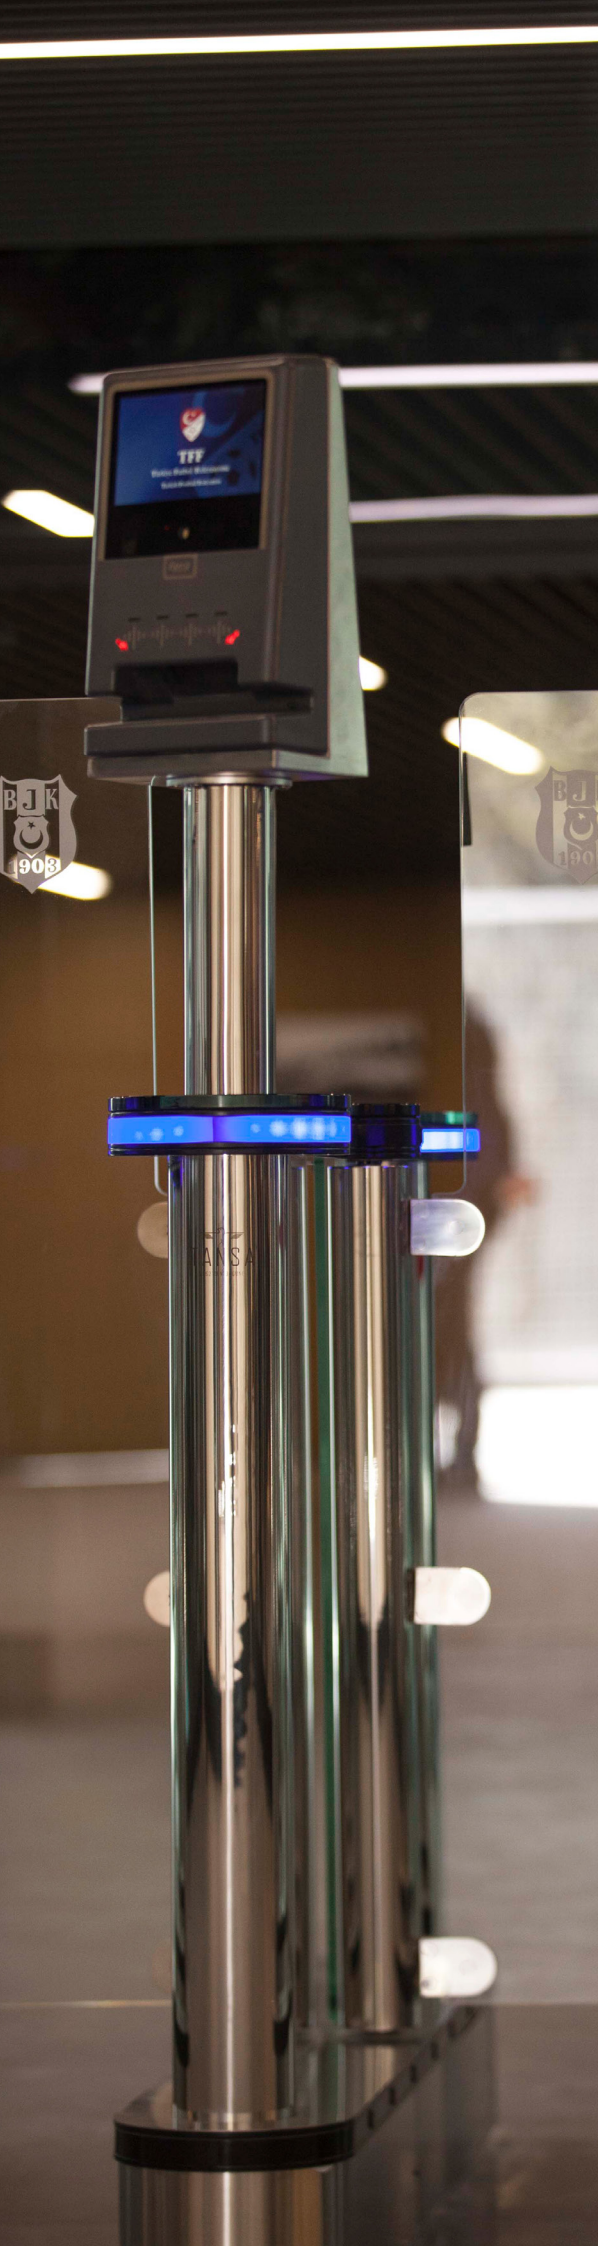

Stadium Solutions

Sports and recreation facilities attracts large crowds that require entry and exit in short periods and create many security and operational problems. Most of these facilities have become multifunctional complexes that conveniently and securely integrate commercial, retail and dining venues. Easy, secure and fast access is essential for the best guest experience.

TANSA provides full height and waist height turnstiles and also speed gates to control pedestrian traffic from specific entrances and exits of fans and spectators with its global experience and extensive knowledge in stadiums and sport facilities.

TANSA offers complete integration with electronic ticket and access control systems.

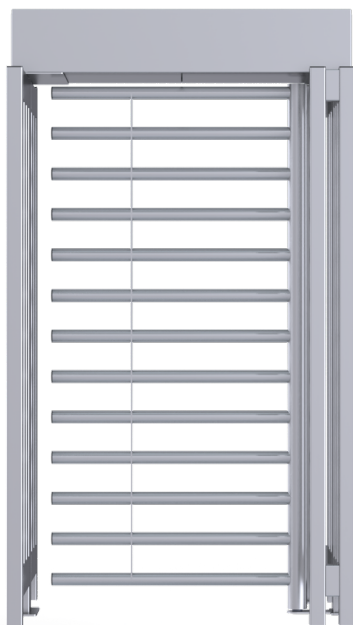

Full Height Turnstiles

Full Height Turnstiles are suitable for installation both indoors and outdoors at stadiums and sport facilities to ensure high-security and controlled passages at entry points.

Full Height Swing Gates

Full height swing gates are perfect for both internal and external applications. The motorised full height swing gates are designed for wheelchair passage and transporting goods.

Speed Gates

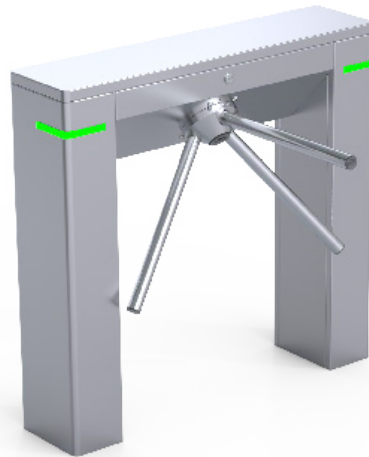

Speed gates are best suited for aesthetically demanding spaces like VIP entrances of stadiums and sport facilities.

The speed gate's built-in electronics offers easy integration with access control and ticketing systems. The speed gates are designed with sliding or swinging wings that are either half or full body size.

Tripod Turnstiles

Tripod turnstiles are suitable for both indoor and outdoor implementation and offer bidirectional passage. The tripod turnstiles are affordable and can be easily integrated with any access control system. They allow free exit in case of power failure or an emergency, or as required by the administration systems. They offer safe and practical passage.

Swing Gates

Swing gates are perfect for both internal and external applications and can be supplied with signs, including "STOP," "PASS" and "BLOCKED". The motorised swing gates are designed with a wider passage for wheelchairs and or transporting of larger items.
